THE STATE OF SOUTH CAROLINA.

A correspondent writes from South Carolina that the times are very hard, and that many families are in want of food and clothing. The situation of the people is very critical, and it is feared that the state will not be able to support itself. The government has been compelled to make large expenditures for the support of the poor, and the revenue is not sufficient to meet the demands. The state is in debt, and the credit of the government is impaired. The people are suffering from the effects of the war, and the future of the state is uncertain. It is hoped that better times will come, and that the state will be able to overcome its difficulties.

THE CONGRESS.

The Senate and House of Representatives have been in session for some time, and have been engaged in the consideration of important legislation. The most pressing business has been the passage of measures for the relief of the poor and the encouragement of industry. The government has also been called upon to make large expenditures for the support of the army and navy. The credit of the government is impaired, and it is feared that the country will not be able to meet its obligations.

THE RAILROADS.

The railroad companies have been active in the construction of new lines, and the old lines have been improved. The government has made large expenditures for the construction of new lines, and has also been called upon to make large contributions to the support of the old lines. The credit of the government is impaired, and it is feared that the country will not be able to meet its obligations.

THE SCHOOLS.

The school system of the state is in a fair condition, and the education of the people is being improved. The government has made large expenditures for the support of the schools, and the money has been well spent. The people are well educated, and the future of the state is certain.

THE WARS.

The war with the Confederates has been a severe struggle, and the United States have sustained heavy losses. The government has been compelled to make large expenditures for the support of the army and navy, and the credit of the government is impaired. It is feared that the country will not be able to meet its obligations.

THE郵箱.

The United States mail is being delivered regular, and the people are well supplied with the necessary supplies. The government has made large expenditures for the support of the post office, and the money has been well spent. The people are well supplied, and the future of the state is certain.

CHAMBERSBURG
RURAL MATTERS.

John Brown's money is in. This may be taken as the motto of a new place, which is already becoming a resort for New Yorkers, who find the climate of that city too much for them. They flock to this place, which is situated on the west side of the mountain, and which, by its climate, is said to be equal to that of the south. It is a blooming place, and the people are said to be very hospitable. The climate is described as being very healthy, and the people are said to be very happy. The place is said to be very beautiful, and the people are said to be very friendly. The climate is described as being very healthy, and the people are said to be very happy.
