THE DEMOCRATIC PARTY AND THE OPPOSITION.

It is a fact beyond question that the Democratic party, when acting within the bounds of its proper principles, will ever be the true custodians of the welfare of the republic. The Democratic party is the party of the people; it is the party of the small farmer, the mechanic, and the laborer; it is the party of the working man, and of the working man's wife and children. It is the party of the common school, and of the common school teacher. It is the party of the country, and of the country's interests. It is the party of the free soil, and of the free soil's advantages.

The policy of the Democratic party is the policy of the Constitution. It is the policy of the Constitution as interpreted by the best men of the country, and as followed by the government of the United States. It is the policy of the Constitution as it has been interpreted and followed by the government of the United States for many years past.
